

COMMUNICATIONS

The success of a company in the technological field is based on knowledge. DOMINION have technical staff with solid knowledge in:

Networking: LAN, WIFI networks, Collaboration Solutions, Network Security and Datacenter.

Radio: TETRA Systems, DMR and radio links.

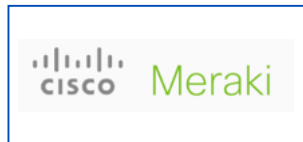

Transport Systems: SDH and MPLS

Communications Infrastructure: structured cabling and Fiber Optic in buildings and industrial environments.

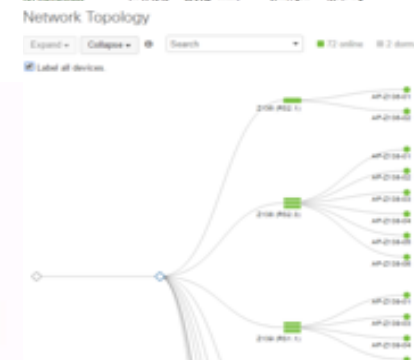

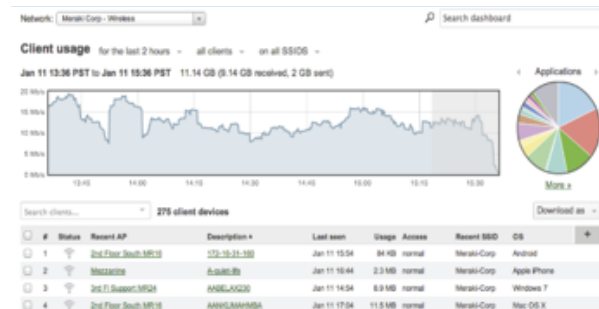

We work with manufacturers of proven quality, being for more than 20 years, Cisco Systems Premier Partner, a leader in the market of communication networks. Extensive experience in critical network transport systems (SDH and MPLS).

Our knowledge in radio technologies allows us to make TETRA and DMR deployments and to perform radio links licensed or free band.

We provide global communications solutions at the level of Physical Infrastructure, IP Technology and Radio.

We are certified installers of structured cabling and fiber optic manufacturers with a strong presence in the market, being Systimax Select Installation Partner, which guarantees the perfect knowledge of the latest technologies in cabling infrastructures, as well as intelligent cabling systems (ImVision).
