

DOMINION earns 34% more in the first quarter

DOMINION confirms the upward trend of the company with a net result that grows 34% in the first quarter of 2018 compared to the same period last year.

Bilbao, 18th April 2018.

The quarterly results presented today by DOMINION show double-digit growth in all the results lines, as well as in the adjusted turnover, which has increased by 20%, reaching 192 million euros in this first quarter of the year.

With these results, the company grows organically 11% at constant currency, well above the market and its strategic objectives of an annual growth of over 7%.

These data are accompanied by an EBITDA and an EBITA that increase 28% and 23% respectively, in relation to those obtained in the same period last year.

After announcing a backlog of projects of more than 600 million euros at the end of the year, the turnover of the Solutions area in this period confirms the strength and visibility in this segment, which already weights 43% of the company's total turnover.

By geography, the growing presence of projects in America (35% of turnover) and Asia (10%) stands out; mainly due to the good evolution in the fields of Industry and Energy.

On the other hand, the complete integration of Phone House, acquired in September 2017, has contributed to increase the weight of the T&T activity field (Technology and Telecommunications) to suppose 53% of turnover.

Mikel Barandiaran, CEO of DOMINION, highlighted "the enormous importance of these levels of growth in the current context of consolidation", especially in reference to technological services and industrial maintenance.

A positive quarter for DOMINION, which continues to move towards its medium-term strategic objectives, which includes becoming a company that bills 1,000 million euros and reaches 80 million euros of EBITA.

More information on the results of the First Quarter of 2018 in the attached presentation and published on the company's website: <http://www.dominion-global.com/web/investors-website/hecho-relevantes>

About Dominion
